TU Delft publications

WHAT'S IN IT FOR ME ?

By making your publications freely accessible you share your knowledge with scientists all over the world, including those in developing countries, and share the latest scientific information with businesses. You also give account for the public funds that were used. An increasing number of financiers, such as NWO and the European Union, make specific conditions regarding Open Access publishing and data management.

Easier to find	More citations	Wider dissemination	Societal benefits	Economic interest

TU Delft supports Open Access publishing by its researchers in several ways

Policy	Funding
Infrastructure	Advice
